Agile Meets Design Thinking

Running Product Design Sprints

Managing an Agile Team

Testing with Agile

Agile Development in Practice
(Project-centered Course)

06/20/2017

Paulo Henrique Cardoso

has successfully completed the online, non-credit Specialization

Agile Development

You've mastered the principles of the agile development process, from running design sprints to managing teams and creating a culture of experimentation. Your final Capstone project demonstrates your ability to manage software development using agile techniques. You are now ready to lead a high-functioning agile program. This specialization can be accessed at: <https://www.coursera.org/specializations/agile-development>

Alexander Cowan,
Adjunct Faculty
